

## Only AFCO Offers Intelligent Mail Tracking for ISU Agents

AFCO's **Intelligent Mail Tracking (IMT)** solution helps ISU agents save time and expense on reinstatements by reducing avoidable cancellations.

AFCO can verify that an insured's remittance is in the mail through our exclusive **Intelligent Mail Tracking** solution provided at no cost to ISU agents.

### How it works:

- Using an automated interface between AFCO and the U.S. Postal Service, **IMT detects and tracks your insured's payment** once it is in the mail.
- This IMT interface **automatically places a temporary hold on any cancellation notice** — avoiding unnecessary cancellations, subsequent reinstatements and customer complaint calls to your office.
